

Recycling is Good for Business

Did you know that recycling could lower the cost of trash disposal? Idaho County Recycling (ICR) has three programs that help your bottom line and the environment!

Bag-It System

The Bag-It system is used to collect discarded office paper, colored paper and mail. It includes four woven recycling bags and a two-bag rack. When a bag is full, take it to an ICR recycling site and exchange it for another. This handy system sells for \$42.

Shredding

Paper shredding services include a 65-gallon secured cart and padlock with no monthly rental cost (a refundable deposit of \$40/per cart applies). Shredding rates are \$22/full cart and \$11/half cart (after the first full cart). Lewis Clark Recyclers Inc. (LCRI) of Lewiston, Idaho provides this shredding service. LCRI is National Association of Information Destruction (NAID) certified for mobile/onsite services and Idaho County Recycling receives a share of shredded paper returns.

Cardboard Services

Idaho County Recycling accepts flattened cardboard at all sites during regular collection hours. Outside of regular collection hours, ICR provides cardboard compacting at Cash & Carry grocery, 222 E Main Street in Grangeville for a small fee. Cost varies depending on cardboard volume but is generally \$25 per month. For more information or to download forms visit:
