

Hi all,

There was a discretion noted on one of the bid projects. The Powell Star Meadows project is not for a total of 80+ acres. The bid should be for 9 acres and is for the road leading into the gravel pits found in the maps and for the 2 gravel pits themselves. I know that this makes a big difference on how this job will be bid but bid accordingly, and we will adjust the budgetary side accordingly to your bids as it is a bit of a drive to get there. This job can be done with a pickup, or an ATV/UTV but may also include a slight need for some handline or backpack spraying as it does include 2 Gravel Pits.
